Question Answer Log

Question Number	Document	Document Reference	Question	Answer
1	Description for Purchase (DFP)	3.5	Item 3.5 in DFP-662 Rev B states that components of the GPSS should be divided between no more than 4 tool boxes. This poses an issue as the previous kit would not completely fit into the 4 tool cases, and ran over into the portable desk (Item 3.4.15). Will this be acceptable for the current solicitation?	No. This GPSS requirement has less tool load content than previously procured sets. Only the portable desk can be provided outside one of the four tool boxes in accordance with DFP 3.4.7.
2	DFP	3.4	I have not been able to source a Berry compliant item for the following FSC 51 and 52 series items: 3.4.30 File Set, Chain Saw 3.4.79 Tape Measuring	DFP 3.4.30 specifies a swiss pattern file which is exempt from the Berry Amendment in accordance with FAR 25.104(a). A suggested equivalent for the Tape Measuring at DFP 3.4.79 is US Tape Part# 56737.
